URMA announces strategic partnership with SIKULAN Mexico

URMA AG is pleased to announce its investment in SIKULAN Mexico. This partnership contributes to the expansion of the international sales network and marks a further milestone in the global orientation of URMA AG.

Mexico is an attractive future market with a strong industry, particularly in the automotive and aviation sectors. SIKULAN Mexico is the ideal partner to support local customers in a more targeted manner and to exploit the full potential of URMA technology: with strong local roots, technological expertise, and a clear focus on quality and customer service. The company, based in Querétaro, is an established supplier of precision tools and manufacturing technologies for various industries.

New brand under a shared name: SIKULAN URMA

In future, SIKULAN Mexico will operate under the name "SIKULAN URMA". This new brand unites the identities of URMA AG and SIKULAN Mexico and stands for shared values like precision, innovative strength, and customer proximity. The uniform brand identity strengthens the presence in the Mexican market and paves the way for even closer cooperation with local customers and partners.

Oliver Berner, Co-CEO URMA AG:

"Mexico is a strategically important market for us with enormous potential. In SIKULAN Mexico, we have found an experienced and committed partner with whom we can bring our innovative solutions closer to our customers and realize exciting projects together."

Aner Gomez, CEO SIKULAN URMA:

"URMA stands for high-precision tool systems in Swiss quality. For us, the partnership means access to innovative technology and comprehensive expertise that helps our customers to increase their productivity and optimize processes. The perfect match of SIKULAN and URMA products offers them an integrated machining solution for our customers."

Closer to the customer

Thanks to this partnership, URMA customers in Mexico will benefit from even more tailored support – ranging from technical consulting and product training to application-specific solutions delivered directly on site.

About URMA AG

URMA AG develops and manufactures precision tool systems. The family-owned company has had its headquarters and production facility in Switzerland since 1962. URMA also has subsidiaries in Germany, Spain, China, Mexico, and the USA and maintains OEM partnerships with Paul Horn (Germany) and Sumitomo (Japan).

The precision tools are used worldwide for precision bore machining and milling applications in the machine builder, automotive, hydraulic, and aerospace industries. With its high-precision tool systems, URMA increases process reliability for customers and contributes to increased efficiency. URMA supports manufacturing companies with standard and special tools in the development of individual solutions and innovations. Thanks to the optimal infrastructure, test procedures are carried out in the company's own test center for prototypes, new coatings, geometries, chip formers, and special tools for specific customer applications. The Test Center also provides training and further education for partners and customers.

In Switzerland and Liechtenstein, URMA AG is the exclusive sales partner of HAAS – a world-leading manufacturer of CNC machine tools known for its innovative strength and reliability. URMA AG also exclusively offers high-quality, complex machines from EMCO and ZORN, including state-of-the-art turning centers and machining solutions for demanding manufacturing processes. In addition, the portfolio includes a wide range of industrial 3D printing solutions across the entire production chain.
